The revised Forest Plan will take an ecological approach to achieve multiple-use management of the National Forest and National Grasslands.

The Cibola National Forest identified revision topics through a process by examining the Forest Plan and determining items that need to be changed. The Five Year Evaluation and Monitoring Reports for 1986 to 1990 and 1991 to 1996 were also used to identify revision topics. This process included a number of public meetings, newsletters and meetings with local government officials and interest groups. Over 3000 letters were sent to Congressional, governmental, and tribal agencies, organizations, businesses, and individuals. These contacts all aided in identifying the revision topics. Criteria was used to screen potential changes into five possible categories of action:

Revision Topics
Implementation Topics
Legislation Topics
Topics for responsible Government Entities
Research Topics

The Revision Topics are those areas of the Forest Plan, identified through monitoring, evaluation and public involvement, where a potential need for change was identified. The Revision Topics are:

Balancing Land Capability with Resource Demand
Watershed Condition Assessment and Water Uses, Rights, Quality, and Availability Assessment
Biological Diversity
Native American Collaboration
Land Grant Community Collaboration
Land Uses
Oil and Gas Leasing
Population Growth and Social Demographics
Rural Community Economics
